ENTRANCE DOORS BY MASTER CRAFTSMEN

At TOPIC, Austria's specialist entrance door manufacturer, your individual door requirements are in expert hands.

Our production facility combines woodworking, glazing, painting, and metalworking under one roof. Here, traditional craftsmanship, 45 years of experience and technical precision meet the demands of modern architecture and timeless designs.

With passion and attention to detail, we create exclusive, completely bespoke composite entrance doors. Each door is a unique masterpiece, perfectly tailored to the wishes and requirements of our customers.

WE LOOK FORWARD TO BRINGING YOUR VISION TO LIFE.

TIMBER, A RENEWABLE, NATURAL MATERIAL WITH A LOW CARBON FOOTPRINT

CREATES A WARM AND WELCOMING ATMOSPHERE

All TOPIC entrance doors are made with a timber core, a natural and renewable raw material. This material allows us to create an almost limitless variety of designs with excellent insulation properties.

Sustainability is at the heart of TOPIC. We prioritise regional sourcing and carefully select every material to ensure the highest standards of quality.

SURFACES WITH CHARACTER

THE AVERAGE GIVES THE WORLD ITS
EXISTENCE, THE EXTRAORDINARY GIVE IT
ITS VALUE.

Oscar Wilde

Expressive materials with exceptional tactile properties give every entrance door its own distinctive character. The result is a harmoniously coordinated masterpiece that perfectly combines architecture, design, and your personality.

The right surface finish ensures your entrance leaves a lasting first impression.

MASTER SURFACES

TOPICcore

TOPICcore is TOPIC's proprietary waterproof surface system, designed to fully protect the timber core. It offers exceptional freedom in colour and texture, combining outstanding durability with a refined tactile finish and effortless maintenance. TOPICcore forms the foundation of all surface finishes across the T, T1, T2 and Klassik collections.

LACQUERED SURFACES

Choose from thousands of shades, including the extensive RAL, HF, HFM and NCS colour ranges. Explore the wide spectrum of colours and discover the perfect shade for your dream entrance door. Lacquered finishes are especially easy to maintain, ensuring your door retains its beauty for years to come.

HPL EXTERIOR

HPL Exterior panels are high-pressure laminates manufactured under extreme pressure and high temperatures. They are exceptionally durable, weather-resistant and colourfast, with excellent resistance to scratches, solvents, hail, frost and heat. Their robust surface is also remarkably easy to clean, making them an ideal choice for long-lasting exterior applications.

TOPIC NT DECOR ANTIQUE OAK

This new surface finish has been developed especially for customers who appreciate the craftsmanship of our master artisans and the distinctive appearance of our reclaimed oak finishes. It is ideal for those who prefer a surface that retains its original look over time, rather than developing a natural weathered patina. With a tactile feel comparable to our TOPICcore finishes, it offers a pleasantly refined surface, is maintenance-free and exceptionally easy to care for.

EXCLUSIVE SURFACES

UNWEATHERED, OILED ANTIQUE OAK

Genuine reclaimed oak, matured over centuries and hand-hewn by skilled craftsmen, forms the basis of this exceptional finish. The brushed surface highlights the unique character of the timber, while a specially developed air-drying natural oil protects the wood from the environment and preserves its authentic appearance.

WEATHERED ANTIQUE OAK

Genuine reclaimed oak, hand-hewn and matured over generations, forms the basis of this extraordinary finish. The 100 to 500-year-old timber is carefully restored and refined by skilled specialists using traditional handcraft techniques, creating an elegant, sustainable surface with a beautifully natural appearance and an exceptionally refined tactile quality.

ANTIQUÉ SPRUCE

Genuine reclaimed spruce from the Alpine region, naturally weathered by the sun and shaped by wind and rain over centuries, is carefully hand-hewn to preserve its authentic character. This sustainable material combines timeless design with exceptional craftsmanship and is remarkably easy to maintain – simply brush or vacuum the surface.

EXCLUSIVE SURFACES

CERAMIC

Ceramic is an exceptionally durable material with outstanding resistance to impact, scratches, UV exposure and the elements. Fired at around 1,300°C, TOPIC ceramic offers exceptional strength and long-lasting performance. Its extremely low water absorption also makes it highly resistant to frost, while everyday care is effortless – simply wipe clean with a damp cloth.

HIMALAYA STONE

Formed over millions of years, stone is a timeless, natural material. TOPIC’s specially developed Leather Look finish creates a beautifully refined, silky-matt surface with a distinctive tactile quality. Both elegant and exceptionally durable, this natural material is scratch-resistant, easy to maintain and designed to retain its beauty for years to come.

CONCRETE

Concrete is a beautifully understated material that develops a natural patina over time. Subtle variations in colour and texture make every concrete element of your TOPIC entrance door truly unique, giving it its own distinctive character. Each element is individually cast in a bespoke timber mould, specially crafted for a single use, ensuring exceptional quality and individuality.

NATURAL MATERIAL ANTIQUE WOOD

WEATHERED BY THE SUN. SHAPED BY
THE RAIN. PERFECTED BY HAND.

Genuine reclaimed timber, matured over generations and hand-hewn by skilled craftsmen, forms the basis of this exceptional finish. Carefully restored by specialists, the 100 to 500-year-old timber is cleaned, repaired, steam-treated and expertly refined to create a beautifully tactile surface.

The resulting refined and understated look gives the timber surface its distinctive character. A sustainable natural material, reclaimed wood is the perfect choice for timeless design and exceptional craftsmanship.

ENERGY SAVING MADE EASY

TOPIC STANDS FOR SUSTAINABILITY,
EFFICIENCY AND SECURITY.

Invest in sustainability and enjoy lasting benefits. A perfectly insulated TOPIC entrance door can help reduce heat loss, saving an average of up to 200 kWh of energy per year.

Replacing your entrance door is quick and straightforward, with minimal disruption to your home. Additional insulation measures can be completed at the same time or added later – a simple upgrade with lasting benefits.

THE 'SMART' COLLECTION

REFINED ELEGANCE MEETS CONTEMPORARY DESIGN

The SMART Collection combines clean, contemporary styling with carefully considered design details. Its minimalist aesthetic creates a timeless entrance with a distinctive architectural character.

The softly rounded corners of the glazed panel give the door its signature look, echoed by the elegantly curved pull handle that complements the design perfectly.

Discover more about the SMART Collection in our dedicated brochure.

THE 'GLANZSTÜCK' COLLECTION

WHERE MODERN ARCHITECTURE AND ENTRANCE DESIGN MEET

The entrance door is an integral part of a home's architectural identity. Inspired by the textures and patterns found in contemporary façades, the GLANZSTÜCK Collection interprets these design elements in four distinctive finishes: Spur, Kokon, Triangel and Blattwerk. The result is a seamless transition between the building's architecture and the entrance door, creating a beautifully harmonious overall design.

Discover more about the GLANZSTÜCK Collection in our dedicated brochure.

FEEL AT HOME, RELAX — LEAVE THE EVERYDAY BEHIND

A COMFORTABLE INDOOR CLIMATE — COLD FEET ARE A THING OF THE PAST.

Warmth creates a sense of relaxation and plays an essential role in our overall comfort and wellbeing. That is why it is important to keep warmth where it belongs — inside your home.

Thanks to the excellent insulating properties of natural timber, TOPIC entrance doors help create a wonderfully comfortable living environment, especially during the colder months.

By preventing valuable heat from escaping, TOPIC entrance doors make an important contribution to maintaining a warm, energy-efficient, and inviting home.

SECURITY APARTMENT ENTRANCE DOORS

TOPIC apartment entrance doors free you from the restrictions of standard building regulations. Create a personalised design for your living space while effortlessly meeting external architectural requirements, visual guidelines, and security standards.

MANY GOOD REASONS TO CHOOSE A TOPIC APARTMENT ENTRANCE DOOR:

- 

Enhanced security up to RC3
RC2 and RC3-tested door systems provide outstanding protection and peace of mind.
- 

Opening width and floor connection remain unchanged
The existing door frame is not clad but reinforced from the inside with a robust steel frame, securely anchored into the masonry with multiple fixing points.
- 

Protection from odour and noise pollution
- 

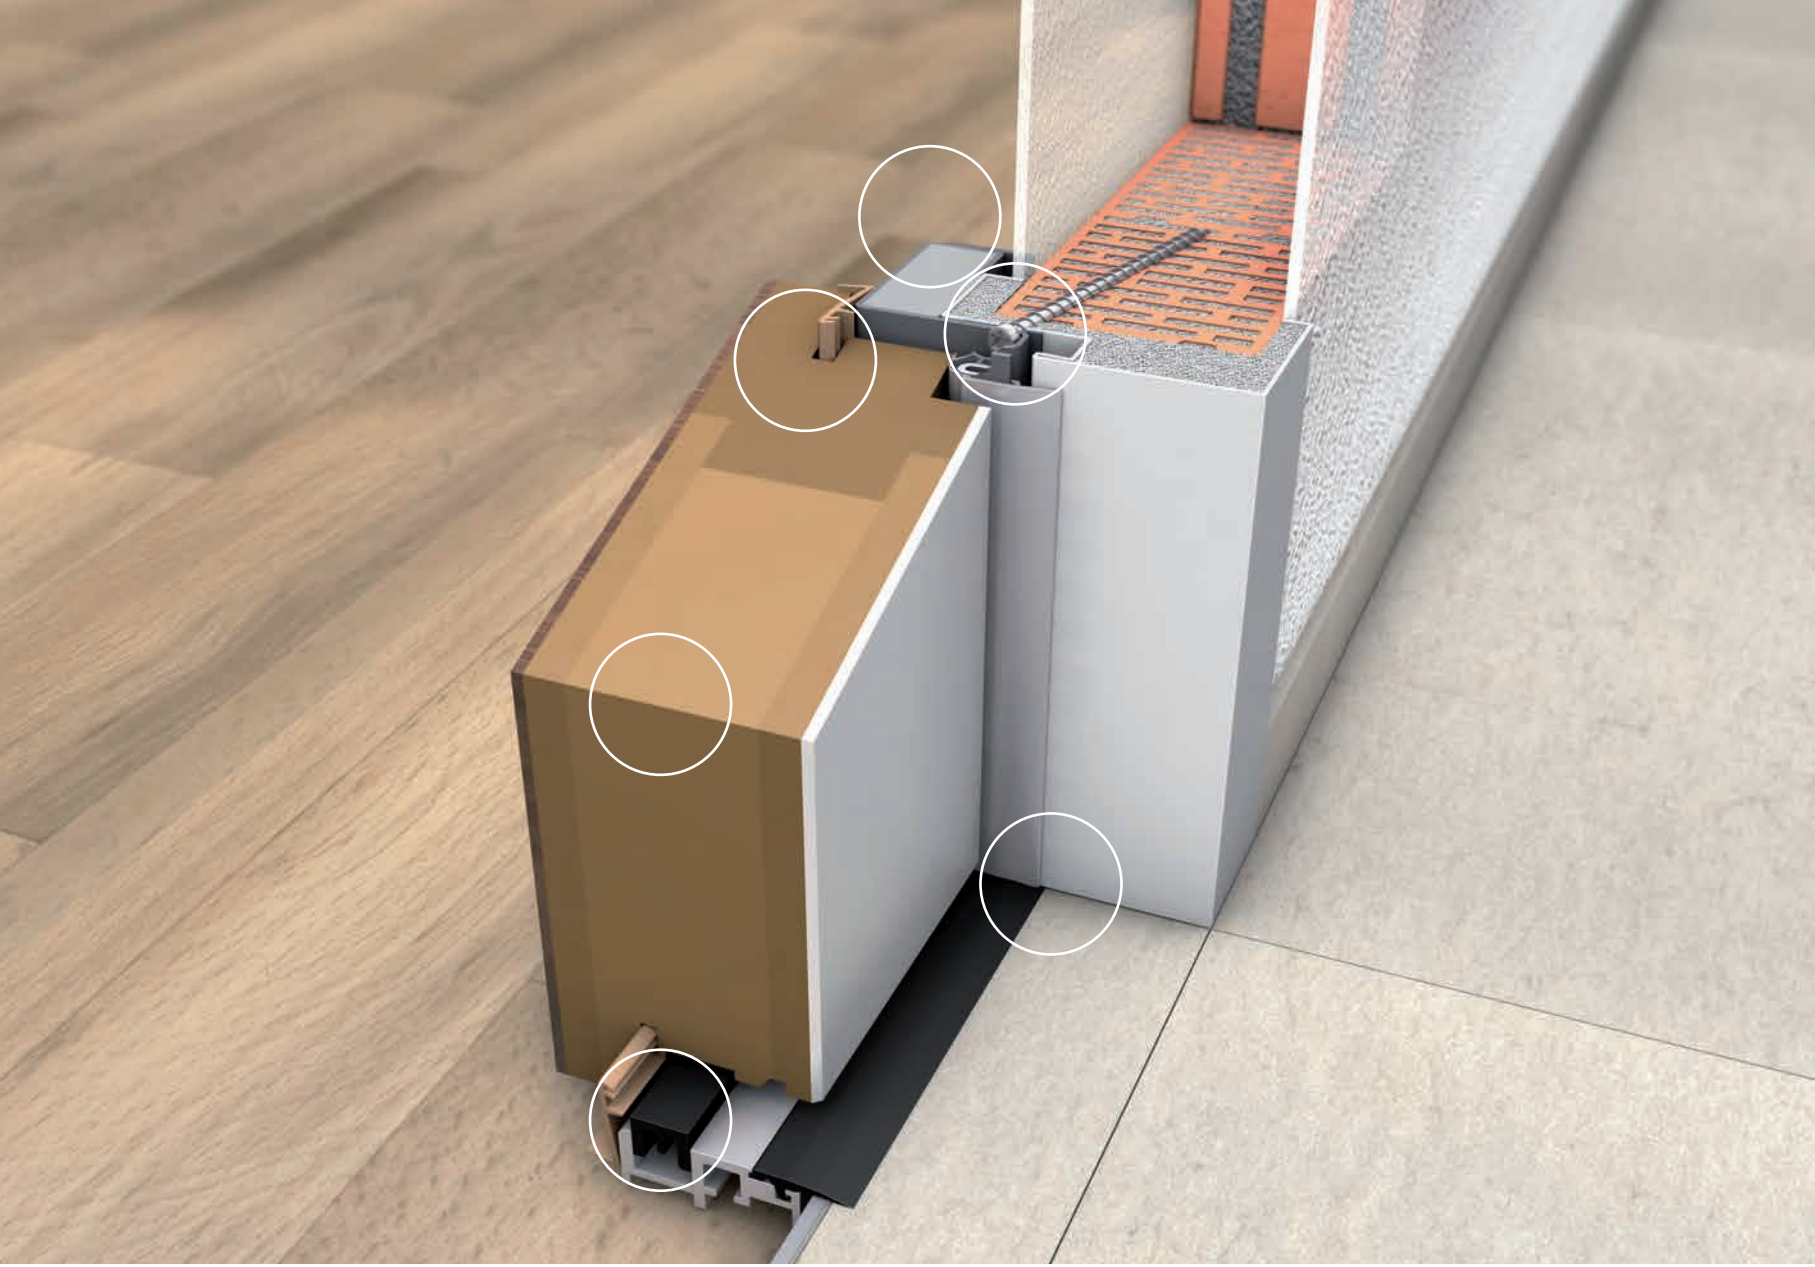

Personalised design options
The outside and inside of the door can be designed completely differently.
- 

Clean and simple replacement
A smart renovation system ensures a smooth door exchange with minimal disruption. Apart from drilling, no messy building work is required.
- 

Consistent exterior appearance
Thanks to TOPIC's specialised renovation system, the floor connection and external appearance remain unchanged.
- 

Fire protection according to EN 13501-2 EI1 30

Be inspired by the TOPIC apartment entrance doors at your TOPIC specialist dealer and request our Security Apartment Entrance Doors folder today at **www.topic.at**.

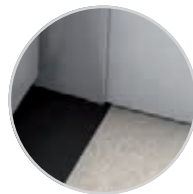

TOPIC steel door frame neatly mounted from the inside to the existing door opening.

Wall anchors securely connect the steel frame to the building structure and remain concealed behind the cover profiles.

TOPIC sealing system reliably protects against odours, drafts and noise.

Cover profiles create a clean, seamless connection between the existing structure, the TOPIC threshold and other door elements.

TOPIC door sash can be individually designed on both sides with different finishes and hardware options.

TOPIC aluminum threshold with integrated ALUMAT magnetic seal. Covers the existing floor connection without additional building work and reliably protects against odour, drafts and noise.

THE CONSTRUCTION OF A TOPIC ENTRANCE DOOR

It's all a question of the right construction

Sample section of the Model series T2 with handcrafted quadruple glass

1 The TOPICcore surface system

TOPICcore is a waterproof protective coating for timber. Developed exclusively by TOPIC, this innovative surface system offers an exceptional range of colours, textures, and design options. Easy to maintain, pleasant to the touch, timelessly elegant.

2 The lacquer or timber surface

The lacquer is a high-quality, UV-resistant, satin-finish specialist coating designed to withstand all weather conditions. When choosing a timber surface, the outer layer consists of premium real wood veneer with a four-layer stain finish.

3 Superior sealing performance

Two sealing levels with high-quality, durable silicone gaskets provide outstanding sealing performance. The result: excellent thermal insulation, a solid acoustic feel, and no more door slamming.

4 Natural fibre insulating core

The natural fibre insulating core provides excellent thermal and acoustic insulation.

5 The laminated timber frame

A specially developed TOPIC laminated timber core construction ensures exceptional stability and resistance to warping.

6 Handcrafted quadruple glazing with six panes

Ensures maximum safety, excellent thermal insulation, and an elegant appearance with perfectly positioned glass spacers, carefully installed by hand.

7 The coated double seal

The specially coated double seal provides enhanced protection against driving rain and improves airtightness around the threshold area.

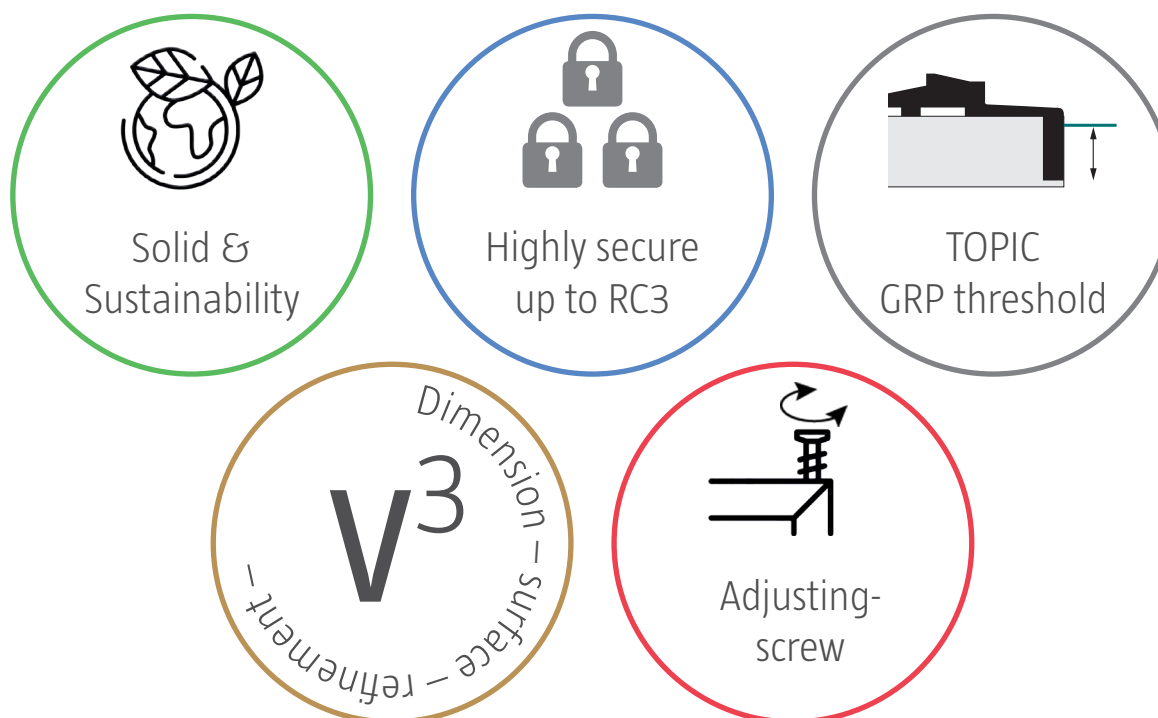

8 The TOPIC GRP threshold

Made from fibreglass reinforced material with a durable woven insert and excellent thermal insulation properties. Unlike metal profiles, it prevents thermal bridging and avoids seals freezing. The TOPIC GRP threshold enables a perfect visual and thermal floor connection for both renovation projects and new builds..

9 The thermal threshold subframe

For improved thermal separation, this solution prevents cold and moisture bridges while ensuring lasting stability – particularly suited for renovation projects..

WHY CHOOSE A TOPIC ENTRANCE DOOR?

Renewable raw material timber, low CO2 footprint

All TOPIC doors are based on the naturally renewable resource timber. The natural fibre insulating core ensures excellent thermal performance and insulation values.

Enhanced Security up to RC3

TOPIC entrance doors meet the highest security standards. Available up to RC3 – the highest security classification for private residential applications.

TOPIC GRP threshold

The TOPIC GRP threshold enables a perfect visual and thermal floor connection, making it ideal for both renovation projects and new builds.

V³ Dimension – surface – refinement

With V3, you select only the door components you need to create your perfect entrance door.

Adjustment screw

The adjustment screw allows any changes to the door sash caused by thermal effects to be quickly and easily compensated for, ensuring long-lasting performance.

THE PLAY OF LIGHT AND SHADOW

LIGHT REVEALS THE BEAUTY AROUND US

Light is an element that has fascinated us for thousands of years. It not only provides warmth and protection but also brings a unique atmosphere and a beautiful glow to our homes. It makes our eyes sparkle and our spaces come alive. Bring this captivating radiance to your entrance area. A virtually unlimited choice of glazed panels, side lights, top lights, and glass designs transforms your entrance into a stunning interplay of light and shadow, creating a truly unique first impression.

SIDE LIGHTS

Glass elements in the entrance area create a welcoming and inviting atmosphere. They allow additional natural light into the interior, making the space feel brighter, more open, and more spacious.

TOPLIGHTS

A toplight adds elegance and height to your entrance area, creating a more contemporary and spacious appearance. It also provides an additional source of natural light while maintaining privacy. The toplight can be positioned across the full width of the entrance door or between two side panels. It can be manufactured up to a maximum width of 2,300 mm and a maximum height of 1,200 mm. Larger elements are available on request. Dimensions are always measured from the finished floor level (FFOK).

DOOR SASH – SPECIAL SHAPES

OPTIONS

Every entrance is unique, and a standard rectangular door is not always the ideal solution. TOPIC adapts your entrance door perfectly to suit your individual requirements and the characteristics of your home.

round arch

A483
segmental arch

Special order basket arch

PROPORTIONAL DESIGN

Every entrance door is unique.

Our designers carefully draw the complete door element to ensure that your chosen design fits the proportions of your entrance perfectly – like a bespoke suit. Every detail, especially glass openings, is precisely sized and positioned to create a harmonious overall appearance.

With TOPIC, you can choose from glazed panels that are individually designed to complement your specific entrance situation.

As these bespoke glass elements are handcrafted to the exact millimetre in our own glass workshop, you can personalise every detail – from the type of glass to sandblasted or engraved designs – to perfectly match your vision. Our master glaziers then create a precise, made-to-measure solution for your entrance door.

GLASS TYPES

TOPIC Security Glazing – Clear Benefits

All TOPIC glass constructions are tested and certified. Before assembly, each pane is carefully inspected by our master glaziers in our own glass workshop. Our laminated safety glass provides outstanding protection against injury in the event of impact and offers excellent resistance against attempted break-ins.

A Wide Range of Glass Options

Glass is one of the most important design elements in modern architecture. It brings natural light into the home, is highly weather-resistant, and easy to maintain. TOPIC uses glass from its own workshop in a variety of ways – as decorative glazing within the door panel, as a glass overlay, or even as a glass door handle. TOPIC offers you following glass options at no extra cost:

Reflo white

Chinchilla white

Satinato white

Float white

ENGRAVED GLASS

On the exterior side, rounded engraved designs can be created, such as those featured on door model B17. On the centre or second pane of glass, we can create a range of decorative finishes, including rounded engraved motifs and V-groove cuts, as showcased in models A102 and A250. We are also happy to bring your individual bevelled glass design ideas to life.

GLASS LACQUER FINISHES

We offer lacquering of glass edges and surfaces in RAL, NCS, and HFM colours, as well as grooved glass finishes applied to the reverse side of the pane. This refined glass treatment has been used for models such as Pure, B35, and B37.

SECURITY & COMFORT

LOCKING IS A THING OF THE PAST.
TOPIC LOCKING SYSTEMS PROVIDE THE HIGHEST LEVEL OF
SECURITY.

TOPIC 5-Point Locking System (Standard)

When locked, the door sash and frame become firmly connected. Robust hook bolts engage deeply into the locking points, providing reliable and long-lasting protection against attempted break-ins.

TOPIC 5-Point Automatic Locking (Optional) – No More Locking Required

Simply let your TOPIC entrance door close gently behind you. Two hook bolts and security pins automatically engage without any effort or interruption, noticing anything. For added convenience, the system can also be combined with an automatic door opener, allowing access from inside via the intercom system or from outside with options such as a fingerprint scanner.

TOPIC FINGERPRINT SCANNER

Integrated into the door sash or, even more discreetly, directly into the door handle, the TOPIC fingerprint scanner combines maximum security with effortless convenience. Your key is always 'on hand' – and you can never lock yourself out again.

With every use, the software continuously learns and adapts, recognising children's growing fingerprints, minor injuries, and changing user habits to ensure reliable access at all times.

TOPIC Fingerprint dLine (Online surface scanner): A stable internet connection is required for registration. User management is handled conveniently via a smartphone app, with biometric data securely stored in the cloud.

TOPIC Fingerprint Scanner (offline surface scanner): Management is possible via a smartphone app (WiFi) or directly through the scanner module. The 'free access' mode allows entry to be granted for a defined period, creating a convenient temporary access function.

Fingerprint Scanner in the door sash

Fingerprint Scanner in the push handle

Fingerprint Scanner mounted at the back of the push handle

TOPIC KEYPAD

The ideal alternative to fingerprint access, the TOPIC Keypad provides secure and convenient entry to your home. The illuminated, easy-to-use glass touchpad is available in anthracite, stainless steel grey, or white, and integrates seamlessly into the door sash or frame. Installed directly into the door, the TOPIC Keypad is compatible with all electric door openers and TOPIC motorised locking systems.

TOPIC Keypad white

TOPIC Keypad anthracite

TOPIC Keypad stainless steel grey

RESISTANCE CLASSES

TOPIC entrance doors meet the highest security standards and offer exceptional resistance against attempted break-ins. The length of time and level of resistance a door provides against forced entry is classified according to resistance classes. These classifications apply to the complete door construction, including the frame, door sash, locking system, hinges, hardware, cylinder, and glazing. Security-tested doors are assessed and assigned to specific resistance classes, with each individual component playing a crucial role in overall protection – from the door leaf and frame to the locking points, strike plate, fittings, cylinder, and glass.

Intruder type: Opportunist

Typical behaviour:

Attempted break-in using physical force, such as:

- Kicking the door
- Pushing against the door
- Lifting or forcing the door upwards
- Pulling the door out of position

Burglary risk: low

Recommendation for building type:

Buildings without direct and ground-level access

Intruder type: Opportunist

Typical behaviour:

Attempted break-in against a locked and secured door element using simple tools, such as:

- Screwdriver
- Pliers
- Wedges

Burglary risk: average

Recommendation for building type:

Residential properties, commercial and public buildings

Intruder type: Experienced intruder

Typical behaviour:

Attempted break-in against a locked and secured door element using additional tools, such as a screwdriver and crowbar.

Burglary risk: high

Recommendation for building type:

Premium residential properties
upscale living area

EXPERIENCE THE UNIQUE

TOUCHES THAT INSPIRE AND DELIGHT

Touch is an essential part of our everyday lives. Every day, our hands interact with thousands of different materials, objects, and textures, creating unique sensations and emotions.

Your entrance door handle is the most personal element of your home's entrance. When choosing the perfect handle, don't compromise. As individual as your hands, TOPIC door handles are designed to create a truly unique experience with every touch.

THE PERFECT HANDLE

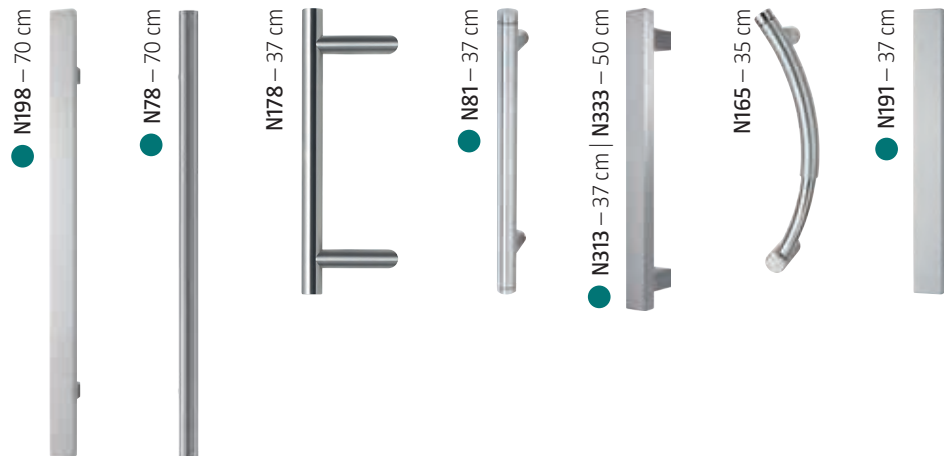

All handles are crafted from stainless steel by TOPIC’s own blacksmiths. Unlike aluminium handles, all TOPIC entrance door handles are scratch-resistant and impress with exceptional material quality and outstanding craftsmanship. Here too, bespoke solutions tailored to your individual preferences are our speciality.

RECESSED HANDLES

Recessed handles give your entrance door that very special touch. They are timeless, discreet and elegant.

PUSH HANDLES IN BLACK

New and right on trend. Black designer handles are subtle and understated, yet make a distinctive statement with their timeless and expressive design.

LIMITLESS DESIGN OPTIONS

INTERIOR VIEW, THAT HARMONISES PERFECTLY

The thoughtful design of your home reflects your individual personality. Whether your style is minimalist and elegant, romantic and playful, rustic, or timelessly beautiful, the interior design of your entrance door can be perfectly matched to the architecture and atmosphere of your living space.

Be inspired by the wealth of interior design possibilities – after all, you see your entrance door from the inside far more often than from the outside.
